

E-Method™

Electronic Method Sheets

E-Method™ provides electronic operational method sheets for operators when they need it most—on-demand. The paperless system ensures that each process is done correctly the first time, every time. Maximum efficiency, maximum profitability. E-Method makes training new operators effortless. Step-by-step Instruction sets are displayed on-demand or may be configured to appear as specified by the system administrator. Without the right tools, production efficiency suffers when experienced personnel are absent due to sickness, retirement, or resignation.

Features:

- Plug-in software module
- Commonly used in conjunction with WIPLog™
- Able to display:
 - Digital images
 - Graphics
 - Method sheets
 - Instructions
 - Call outs
 - Drawings
- Windows® platform

Areas of Use:

- Any sub-assembly process
- Testing Stations
- Compressor lay-in
- Outdoor fan assembly
- Blower assembly
- Control box assembly

Advantages:

- Reduces operator error
- Provides real-time feedback
- Ensures most current information for operators
- Saves time & money by eliminating paper waste
- Eliminates operator-specific dependency
- Shares task-specific knowledge
- Paperless system
