

# NitroCharge™

## Nitrogen Charging System

Once the model/serial number of the unit is scanned, NitroCharge™ charges the unit with nitrogen and verifies that the required amount has entered the coil at the appropriate pressure. NitroCharge then records the final unit model, serial number, and results to a Microsoft SQL® database.

### **Features:**

- Review of data after measurement
- Windows® platform
- Runs on network or local drive for 100% uptime
- Computer controlled sequence of operations
- Manual screen for maintenance control of I/O to aid in troubleshooting
- Fully customizable hardware layout and connection design

### **Included Hardware:**

- Touch screen monitor
- Custom unit connections
- Cordless or fixed bar code scanner
- Capable of scanning key components
- Customer specified PC

### **Advantages:**

- Computer controlled sequence of operations for ease of use
- Increased charging precision
- Interlocks with all ECI IPCS stations
