

UnitTrack™

Order Status Software

UnitTrack™ software allows you to view the order status of your units in real-time. Unit serial numbers are associated with order (lot) numbers. Each IPCS station throughout the assembly line uses the unit serial number to record collected data. When an order number is entered into UnitTrack, the program queries the Microsoft® SQL Server database as to the status (or position) of the serial numbers associated with the given order number.

Order number	Model number	Serial number	Last scanned: IPCS station	Last scanned: date, time	Unit Status
10018	GMNAC60-HU5	18J651R521	NA	NA	Scheduled for 12/18/2002, 10:00:36AM
10018	GMNAC60-HU5	18J651R522	NA	NA	Scheduled for 12/18/2002, 10:01:23AM
10018	GMNAC60-HU5	18J651R523	LeakProof™	12/18/2002, 10:02:01AM	In progress
10018	GMNAC48-HU3	18J651R524	ChargePoint™	12/18/2002, 10:02:01AM	In progress
10018	GMNAC48-HU3	18J651R525	KeyScan™	12/18/2002, 10:02:01AM	In progress
10018	GMNAC48-HU3	18J651R526	AutoTest™	12/18/2002, 10:02:01AM	In progress
10018	GMNAC24-HU1	18J651R527	DataPledge™	12/18/2002, 10:02:01AM	In progress
10018	GMNAC12-HU0	18J651R523	PackOut™	12/18/2002, 10:02:01AM	Shipping

Features & Uses:

- Learn the status of units by entering a serial number or an order number
- Units displayed in real-time
- Used by anyone wishing to track the status of units or orders: Manufacturing, Production, Sales and order processing, Shipping and Receiving, Quality

Advantages:

- Real-time status of units for precise order tracking
- Total IPCS integration

Software Highlights:

- Runs from any networked PC
- Used by anyone wishing to track order status
- Microsoft® Visual Basic® application
- Microsoft® SQL Server® database
- Powered by InterLink™
